

Kwik-Step - Standby Kits

25m Kit

35m Kit

- **maintenance and construction projects**
- **slippages and emergency repairs**
- **bridge inspections and safety work**

Standby Kits are designed to cope with the varying needs of maintenance and construction teams working in adverse conditions

All components are rugged and re-usable and the maximum weight is approx. 40kg

The kits are designed for 'mix & match' assembly and they include a range of profiles to cover gradients from 0°- 50° with minimal site preparation

They are supplied in galvanized steel in a width of 75cm for minimum weight and speed of installation

They include all the tools and components needed for assembly and with every item in use they cover a surface length of either 25 or 35 metres

Each Standby Kit is supplied in a 2-part pallet-based container for speed and convenience in storage and loading
